## **Added Value through Better Measurement !**

Measurement as the decision-making and progress element in industry and society, is the focus of the 14<sup>th</sup> International Congress of Metrology to be held in Paris (France) 22 – 25 June 2009.

The exchanges will take place through oral conference sessions, and, poster sessions providing unique and direct contact between specialists and participants.

You can find on the [www.cfmetrologie.com](http://www.cfmetrologie.com) site how to propose your subjects. **Please note that the deadline for receiving proposals is September 20th, 2008.**

For fun: a prize for the best conference presentation will be awarded during the event.

The industrial Round Table discussion sessions planned for this Congress will cover the following subjects:

- What's at stake for metrology in the health field,
- Metrology and reduction of greenhouse effects gas emissions,
- Metrology and industrial performance,
- Industrial temperatures and new materials,
- Accreditation, economic and strategic issues,
- Wireless measurements in the industrial environment.

**Technical visits** to 4 companies which set up good practices will be available during the Congress.

The **exhibition showing technical innovation and measurement professionals** will be marketed from September 2008.

Finally, in the quite recent current events of the Congress, two first class sponsors have just joined the Collège Français de Métrologie to associate their brand name with the 2009 Congress within the framework of an unprecedented partnership :

- **Stork Intermes**, service provider in the field of calibration and testing of materials,
- **Hexagon Metrology**, leader in Europe in the market of high performance products and instrumentation.

*A unique event of its kind in Europe, the Congress is organised by the "Collège Français de Métrologie" in partnership with EA, Euramet, BIPM, OIML, NPL for the international aspects and the following users of metrology and centres of technical skills: Eurocopter-EADS Group, Renault, Acac, BEA Métrologie, Cetiati, Cetim, IMQ, INSA Lyon, LNE.*
